UNIVERSITY SEAL AND MOTTO

Soon after Northwestern University was founded, its Board of Trustees adopted an official corporate seal. This seal, approved on June 26, 1856, consisted of an open book surrounded by rays of light and circled by the words *Northwestern University, Evanston, Illinois*.

Thirty years later Daniel Bonbright, professor of Latin and a member of Northwestern's original faculty,

redesigned the seal, retaining the book and light rays and adding two quotations. On the pages of the open book he placed a Greek quotation from the Gospel of Saint John, chapter 1, verse 14, translating to *The Word . . . full of grace and truth*. Circling the book are the first three words, in Latin, of the University motto: *Quaecumque sunt vera* (Whatever things are true). The outer border of the seal carries the name of the

University and the date of its founding. This seal, which remains Northwestern's official signature, was approved by the Board of Trustees on December 5, 1890.

The full text of the University motto, adopted on June 17, 1890, is from the Epistle of Paul the Apostle to the Philippians, chapter 4, verse 8 (King James Version).

NORTHWESTERN UNIVERSITY

*Whatsoever things are true,
whosoever things are honest,
whosoever things are just,
whosoever things are pure,
whosoever things are lovely,
whosoever things are of good report;
if there be any virtue,
and if there be any praise,
think on these things.*

Hail to Purple! Hail to White!

CELSA IN HONORE

Hail to thee, Northwestern!

NOSTRO ET AMORE

To our guests

Commencement is the highlight of the academic year. It is that significant occasion, both solemn and joyful, when we honor those students who have completed their course of study. Commencement is important to all of you, the University, and its faculty, staff, and students. To enhance the dignity of the event, you are respectfully requested to avoid unnecessary conversation and moving about during the ceremony. Guests are not permitted on the field at any time.

Smoking is not permitted in Ryan Field or McGaw Memorial Hall.

HENRY S. BIENEN
President

Henry S. Bienen was elected the 15th president of Northwestern University on June 13, 1994. He took office on January 1, 1995.

Mr. Bienen came to Northwestern from Princeton University, where he had served as the James S. McDonnell Distinguished University Professor since 1985 and dean of the Woodrow Wilson School of Public and International Affairs since 1992. A political scientist specializing in modern Africa, he has pursued interests in political and economic development, comparative politics, civil-military relations, and U.S. foreign policy.

Mr. Bienen began his association with Princeton in 1966 as assistant professor of politics and international affairs and was named associate professor in 1969, professor in 1972, and William Stewart Tod Professor of Politics and International Affairs in 1981.

At Princeton Mr. Bienen also served as chair of the Department of Politics (1973–76), director of the African Studies Program (1977–78, 1983–84), director of the Research Program in Development Studies at the Woodrow Wilson School of Public and International Affairs (1979–82), and director of the Center for International Studies (1985–92).

Recipient of two Rockefeller Foundation grants (1968–69, 1972–73) and a Rockefeller Foundation Fellowship for Summer Study (1979), Mr. Bienen was a fellow at the Center for Advanced Studies in Behavioral Sciences at Stanford University (1976–77), a Polsky Fellow at the Aspen Institute (1982–83), a member

PATRICK G. RYAN
Chair, Board of Trustees

Patrick G. Ryan became chair of the Northwestern University Board of Trustees on January 1, 1996, after having served as vice chair since 1993. He has been a member of the Board of Trustees since 1978.

Mr. Ryan is chairman and chief executive officer of Aon Corporation, a global insurance services organization with pro forma revenue in excess of \$8 billion. Aon's common stock is listed on the New York, London, and Chicago stock exchanges. Mr. Ryan entered the insurance business in 1959 as an agent for Penn Mutual. Five years later he founded the Ryan Insurance Group, which merged with Combined International Corporation in 1982. The merged entity was renamed Aon Corporation in 1987.

Past president of the Economic Club of Chicago and the Chicago Boys and Girls Club, Mr. Ryan is a trustee of Rush-Presbyterian-St. Luke's Medical Center and a director of the Tribune Company.

A recent recipient of the President's Medal of Loyola Academy, Mr. Ryan won the 1999 Free Enterprise Award from the Insurance Federation of New York and in 1998 was named one of America's Top 10 Corporate Directors. Also that year, Mr. Ryan received the Marshall Field History Maker Award for Distinction in Corporate Leadership, the Distinguished American Award from the Chicago Chapter of the National Football Foundation and College Hall of Fame, and the state of Illinois's highest award, the Order of Lincoln Medallion. Named the *Crain's Chicago Business* 1997 Executive of the Year and the *Review's* 1997 Industry Personality of the Year, he also received the College

of the Institute for Advanced Studies at Princeton (1984–85), and a Seeger Fellow at the Council on Hellenic Studies at Princeton (1989).

Mr. Bienen has served as a consultant to the U.S. Department of State, National Security Council, Agency for International Development, Central Intelligence Agency, and World Bank as well as the Ford, Rockefeller, and John D. and Catherine T. MacArthur Foundations. A member of the Council on Foreign Relations, he was recently elected to its board of directors. He also serves on the board of directors of the Chicago Council on Foreign Relations, the Shedd Aquarium, Steppenwolf Theatre, the Alain Locke Charter Academy, and Combined Specialty Groups, Inc.

Author, coauthor, or editor of 17 books, Mr. Bienen has also written numerous book chapters and articles. He was the editor of *World Politics* (1973–74, 1984–91) and has served on a number of editorial boards.

Mr. Bienen received a bachelor's degree with honors in 1960 from Cornell University and a master's degree in 1961 from the University of Chicago, where he was awarded a PhD in 1966.

THOMAS Z. HAYWARD JR.
Vice Chair, Board of Trustees

of Insurance's 1997 Industry Leader of the Year Award. Mr. Ryan is a recipient of the Distinguished Americans Award of the Horatio Alger Association, the Business Statesman of the Year Award of the Harvard Business School Club of Chicago, the Distinguished Leadership Award of the Chicagoland Chamber of Commerce, and the Distinguished Citizen Award of the Chicago Area Council of Boy Scouts of America.

Mr. Ryan was national chair of Northwestern's \$21 million Athletic Facilities Campaign (1980-85), which raised funds for the construction of the Henry Crown Sports Pavilion and Norris Aquatics Center and the renovation of existing facilities. The campaign funded the creation of Welsh-Ryan Arena, named in honor of his parents and his wife's parents. Northwestern's stadium was renamed Ryan Field in 1997 to honor the Ryan family.

In 1984 Mr. and Mrs. Ryan established the Patrick G. and Shirley W. Ryan Foundation to provide grants to organizations involved in education, international affairs, cultural activities, and health and social services. The following year they founded the Pathways Center for Children, which provides physical, occupational, and speech therapy for children with physical challenges. In 1990 they established the Pathways Awareness Foundation, a national educational organization for and about children with physical challenges. Mr. and Mrs. Ryan received the 1998 Distinguished Philanthropist Award.

Mr. Ryan received a bachelor's degree in business from Northwestern in 1959.

Thomas Z. Hayward Jr. is a partner in the corporate and real estate departments of Bell, Boyd & Lloyd and a member of the firm's management and executive committees. Past president of the Chicago Bar Association, he is a founding member of its Young Lawyers Section. Mr. Hayward is a past member of the American Bar Association's board of governors, chair of its finance committee, and member of its executive committee; currently he is a member of the ABA house of delegates and chair of the standing committee on federal judicial improvements. He is also a director of the Chicago Area Foundation for Legal Services and the Chicago Bar Foundation. Chair of the executive committee of Harris Bank Barrington and chair of TCR Corporation, he is a former trustee and vice chair of the Columbus-Cabrini Medical Center Board and a former trustee of the Presbyterian Church of Barrington.

Elected to the Northwestern University Board of Trustees in June 1997, Mr. Hayward currently serves as vice chair. He is also a member of the development committee, chair of the alumni relations committee, and cochair of Campaign Northwestern. Mr. Hayward has served as president of the Northwestern Alumni Association and the Northwestern Club of Chicago, an alumni trustee, chair of the John Evans Club and the Alumni Regents, director of the Northwestern Gridiron Network, a member of the School of Speech National Advisory Council, chair of the Dental School Visiting Committee, and a member of the capital campaign steering committees for undergraduate scholarships, athletics, the School of Law,

and the general alumni fund. He is a recipient of the Northwestern Alumni Association's Alumni Service Award.

Mr. Hayward received a bachelor's degree with honors from Northwestern in political science and a JD from Northwestern's School of Law, where he was awarded the Wigmore Key. In addition, he holds an MBA from the University of Chicago. His wife, Sally, and their three sons are also Northwestern alumni; the five Haywards are third- and fourth-generation graduates of the University and have earned a total of nine Northwestern degrees.

HISTORY OF NORTHWESTERN

The founding of Northwestern University by nine devout Methodists embodied a mixture of religious conviction and secular optimism that is uniquely American. Meeting above a hardware store in the burgeoning frontier town of Chicago, these nine men resolved on May 31, 1850, to establish an institution of “the highest order of excellence” to serve the people of the original Northwest Territory as established by the Northwest Ordinance of 1787 (Ohio, Indiana, Illinois, Michigan, Wisconsin, and part of Minnesota). The 1851 Act of Incorporation creating Northwestern University contained a provision reflecting the strong religious beliefs of its founders but requiring no particular religious faith of students or members of the faculty.

Only one of the founders, physician John Evans, was a college graduate. The quintessential renaissance man, he built railroads, founded both the Illinois Medical Society and the Illinois Republican Party, and was a confidante of Abraham Lincoln, who appointed him governor of the Colorado Territory. Evans guided Northwestern during its critical early years, chairing the Board of Trustees from the time of the University’s founding in 1851 until his death in 1897. The town that grew up around Northwestern was named Evanston in his honor.

Northwestern grew and prospered under Evans’s stewardship. In 1853 the University bought and began to develop 379 acres of lakeshore farmland. By 1855 the University had completed its first building and opened a College of Liberal Arts comprised of two faculty members and ten male students. By 1869 Northwestern had admitted its first female students; four years later, it negotiated a merger with the Evanston College for Ladies, whose president, eminent suffragette and temperance movement leader Frances E. Willard, became Northwestern’s first dean of women.

At the turn of the century Northwestern consisted not only of a liberal arts college but also six undergraduate and graduate professional schools, including the schools of law and medicine in Chicago. With the establishment of the Graduate School in 1910, Northwestern adopted the German university model of providing graduate as well as undergraduate instruction, emphasizing research along with teaching.

The University’s development since then has paralleled the growth of metropolitan Chicago. Today Northwestern is a private research university of distinction, with 11 academic divisions located on two lakefront campuses in Evanston and Chicago; it has more than 2,000 full-time faculty, more than 13,000 full-time students, and an annual budget exceeding \$1 billion. Northwestern’s vision of excellence — although faithful to its founding — invigorates a territory far beyond the old Northwest Territory through the accomplishments of its alumni and by virtue of a distinguished faculty and highly selective student body drawn from across the nation and around the world.

SCHOOLS OF THE UNIVERSITY

The **Judd A. and Marjorie Weinberg College of Arts and Sciences**, established in 1851 as the College of Liberal Arts, offers the degree of bachelor of arts. Through the School of Continuing Studies, the Weinberg College of Arts and Sciences also offers the degrees of bachelor of philosophy and bachelor of science in general studies.

The **School of Continuing Studies**, established in 1933 as University College, offers courses leading to the degrees of bachelor of philosophy and bachelor of science in general studies, conferred by the Weinberg College of Arts and Sciences, and the degree of bachelor of philosophy in communication, conferred by the School of Speech.

The **School of Education and Social Policy**, established in 1926 as the School of Education, offers the degrees of bachelor of science in education and social policy and master of science in education and social policy.

The **Robert R. McCormick School of Engineering and Applied Science**, established in 1909 as the College of Engineering, offers the bachelor of science degree. The McCormick School also offers master's degrees in engineering management, information technology, manufacturing engineering, and project management.

The **Graduate School**, established in 1910, administers all advanced programs leading to the degrees of doctor of philosophy, master of arts, master of fine arts, master of public health, and master of science.

The **Medill School of Journalism**, established in 1921 and named in honor of pioneering Chicago journalist Joseph Medill, offers the degree of bachelor of science in journalism as well as master of science degrees in journalism and integrated marketing communications.

The **School of Law**, established in 1859, offers the degrees of juris doctor, master of laws, and doctor of juridical science.

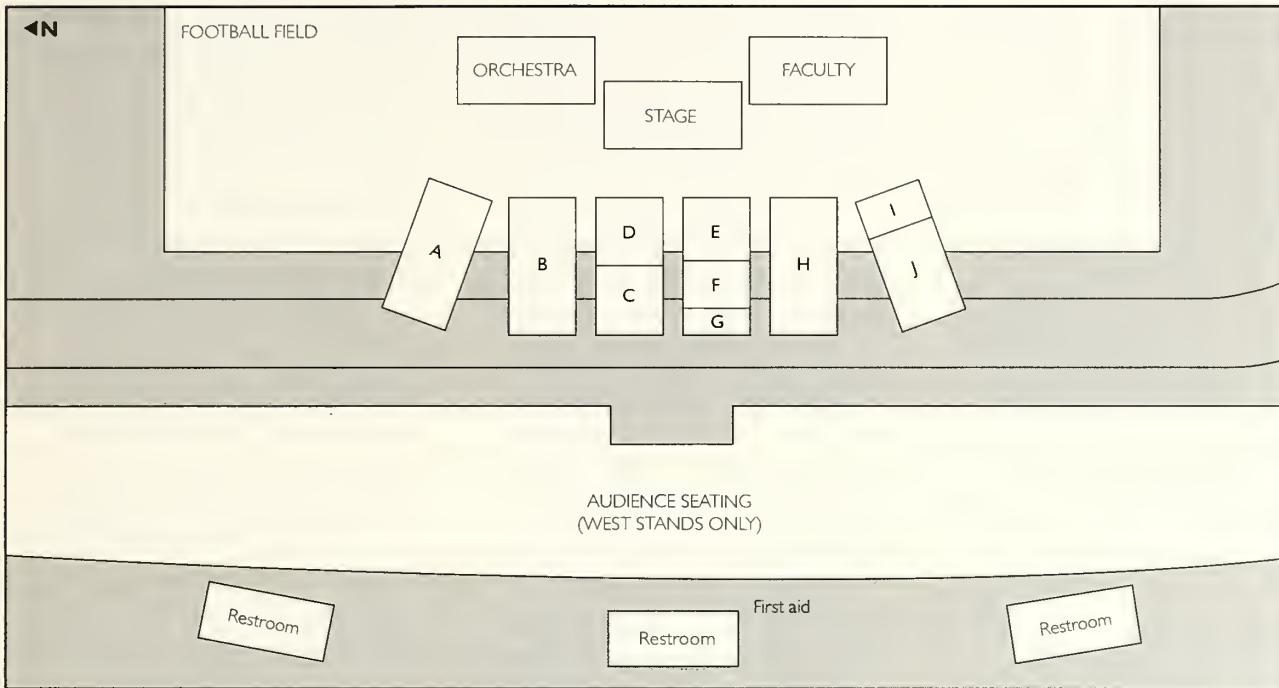

The **J. L. Kellogg School of Management**, established in 1908 as the School of Commerce, offers the master of business administration degree. In addition to the full-time program, Kellogg also offers the evening Managers' Program on the Chicago campus and the weekend Executive Master's Program on the Evanston campus.

The **Feinberg School of Medicine**, established in 1859 as the Medical School, offers the degrees of doctor of medicine, bachelor of science in medicine, doctor of physical therapy, and master of physical therapy.

The **School of Music**, established in 1895, offers the degrees of bachelor of music and bachelor of arts in music. In its graduate division, the School of Music offers the degrees of doctor of music and master of music and the certificate in performance.

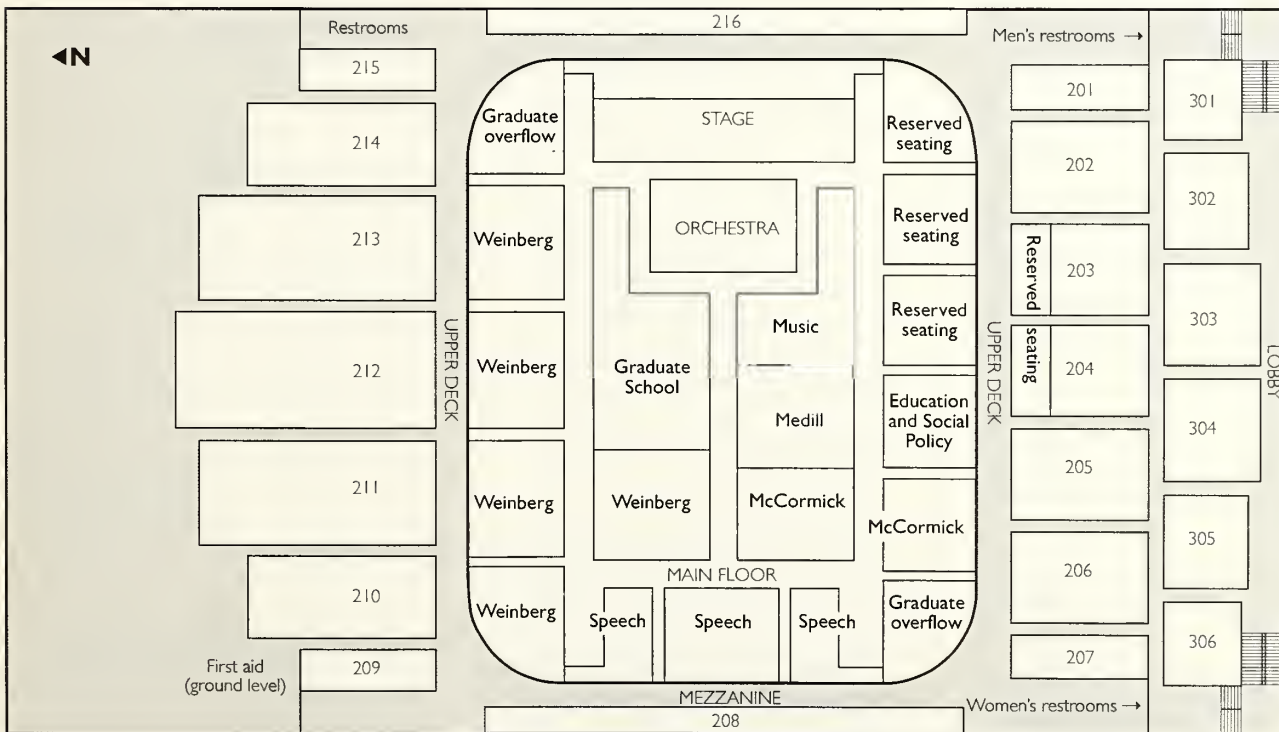

The **School of Speech**, established in 1878 as the School of Oratory, offers the degrees of bachelor of science in speech and master of science in communication. Through the School of Continuing Studies, the School of Speech also offers the degree of bachelor of philosophy in communication.

ACADEMIC PROCESSION AND DRESS

ACADEMIC PROCESSION

The procession begins with the participating schools of the University. Each school group is preceded by its banner. The formation within each school begins with those graduates receiving the highest degree awarded by that school; doctoral candidates are followed by master's candidates, who in turn are followed by bachelor's candidates. Following the graduates are the University faculty, trustees, administrators, and deans. The president's party, led by the senior class Commencement committee, completes the procession.

ACADEMIC DRESS

Modern academic attire originated in the medieval universities of Europe, where gowns were worn daily to provide warmth in poorly heated buildings and to differentiate scholars from other citizens. Two English universities, Oxford and Cambridge, are particularly noted for developing the authentic academic costume, which has changed only slightly through the centuries.

In the United States most academic dress follows the general provisions of the Intercollegiate Code of 1895, which was revised in 1932 and again in 1959. Under this code the gowns' trim and sleeve design indicates the level of the degree. The bachelor's gown has pointed sleeves and is worn closed; the master's gown has oblong sleeves with an arc at the bottom and may be worn open or closed; and the doctor's gown, which may also be worn open or closed, has velvet facings down the front and three velvet bars on the bell-shaped sleeves. This velvet trim may be black or the

prescribed color of the academic area. The recommended color for gowns is black, although many institutions have adopted colored gowns. Graduates of foreign universities wear gowns of various colors.

The style of hood identifies the level of the degree, the school that granted it, and the academic area. Hood length and border width show the level of the degree. The bachelor's hood, which is optional and not worn at Northwestern University, is three feet in length; the master's, three and one-half feet; the doctor's, four feet. The velvet border of the hood is two, three, and five inches wide for the bachelor's, master's, and doctor's degrees, respectively. The hood is lined with silk in the official color of the school. At Northwestern the hood is lined in purple (the school's color) and gold. The color of the hood's border — and at Northwestern the color of the cap's tassel as well — indicates the academic area. At Northwestern the colors for the Graduate School constitute an exception; tassels are black, but the border color of the hood indicates the specific degree awarded.

The square black mortarboard is the recommended cap, although some schools have adopted other styles. Caps are worn throughout the Commencement ceremony, except that men remove them for the national anthem, invocation, and benediction.

At Northwestern University members of the following honor societies may be recognized by the honor cords, medallions, and stoles worn: Alpha Sigma Lambda national honor society, burgundy and gold honor cord; Deru honor society, purple and gold honor cord; Eta Kappa

Nu electrical engineering national honor society, red honor cord; Kappa Theta Epsilon national honor society for cooperative engineering education, maroon and gold honor cord; Mortar Board senior honor society, silver and gold honor cord; Omega Chi Epsilon chemical engineering honor society, maroon honor cord; Pi Sigma Alpha national honor society, brass medallion with red ribbon; Pi Tau Sigma mechanical engineering honor society, blue and rose honor cord; Tau Beta Pi national engineering honor society, white stoles embroidered with the society's symbol in orange; Zeta Phi Eta national professional fraternity in communication arts and sciences, pink and ivory honor cord.

The tassels and borders of the hoods are the following colors:

Judd A. and Marjorie Weinberg College of Arts and Sciences	White
School of Education and Social Policy	Light blue
Robert R. McCormick School of Engineering and Applied Science	Orange
Graduate School (tassel)	Black
<i>Border colors:</i>

HONORARY DEGREES

T. J. ANDERSON

Doctor of Fine Arts

One of the leading composers of his generation, Anderson is recognized for creating music that synthesizes Eastern and Western classical traditions with the black experience in America. He earned a PhD in composition from the University of Iowa and has held more than a dozen academic positions, including service at Tufts University, where he chaired the music department, and at Northwestern's School of Music, where he served as composer in residence. Known for his orchestration of Scott Joplin's opera *Treemonisha*, Anderson takes pride in his collaborations with authors and visual artists. His compositions include *Walker*, a chamber opera with a libretto by Derek Walcott, and *Soldier Boy*, based on a libretto by the late Leon Forrest, a longtime Northwestern faculty member. Anderson is currently writing an opera based on research by Northwestern history professor Timothy Breen about a Massachusetts slave executed in 1768 for a crime he probably did not commit.

Presented by Timothy H. Breen, William Smith Mason Professor of American History, Judd A. and Marjorie Weinberg College of Arts and Sciences

If music is the universal language, you are a celestial linguist. With artistry, craft, and imagination, you translate your understanding of the human experience into melody, reaching our hearts by way of our ears. When you learned of research by a Northwestern history professor about an unjustly executed American slave, you were inspired to transform it into an opera and thus illuminate a disturbing part of our heritage. As an internationally renowned composer, conductor, orchestrator, and educator, you generously share with the world your art and your passion for music. You appeal to myriad listeners in embracing diverse musical genres, and you expand the audience for all the arts through your collaborations with artists of other media. We applaud your music as we applaud your example.

KOFI A. ANNAN

Doctor of Laws

Secretary-general of the United Nations since 1997, Annan became a UN staff member in 1962 and has spent almost his entire career with the organization. Born in Ghana, he completed his undergraduate studies in economics at

Minnesota's Macalester College and pursued graduate study in Geneva and at the Massachusetts Institute of Technology. The first secretary-general to be elected from the ranks of the UN staff, Annan held a variety of increasingly responsible positions with the organization, including assistant secretary-general for peacekeeping operations and undersecretary-general. As secretary-general he has worked to enhance the effectiveness of UN peacekeeping missions, build partnerships with civil society groups and the private sector, and protect the global environment. He is also credited for his efforts to reorganize UN management and to improve the status of women in the secretariat. Along with the organization he leads, Annan was awarded the 2001 Nobel Peace Prize.

Presented by Lester Crown, life trustee, Northwestern University

You have aptly been called "the moral compass of the United Nations." Time and again you have drawn us back to the goals of the UN charter — universal human rights, the rule of law, and the values of equality, tolerance, and human dignity. Known for your gentle, modest candor, you took on what has been labeled the world's most difficult job and in so doing revealed your enormous strength. Without losing sight of your ideals, you have faced the realities of our tumultuous world and proved yourself a courageous and innovative leader. We all have benefited from your efforts to revitalize the UN and empower its peacekeeping missions. You are truly a citizen of the world, and we are honored to welcome you as a member of the Northwestern family.

JOHN W. HUTCHINSON

Doctor of Science

Gordon McKay Professor of Applied Mechanics at Harvard University, Hutchinson is a worldwide leader in the mechanics of solids, especially the problems of stability and fracture of structures and materials. He is recognized for his work on crack growth and stability, particularly significant for the safety of aging aircraft. Hutchinson has contributed greatly to the understanding of plate and shell buckling, with important consequences for the design of aerospace structures and undersea pipelines. His achievements include major advances in the micromechanics of ceramics, coatings, and interfaces related to the development of high-temperature structural materials. Hutchinson's most recent work concerns the

development of gradient plasticity theory on the micrometer scale, essential in the production of nanocomposites, thin films, and micromechanical electrical systems. A member of the National Academy of Sciences and the National Academy of Engineering, he holds a PhD from Harvard University.

Presented by Zdenek P. Bazant, Walter P. Murphy Professor of Civil Engineering, Robert R. McCormick School of Engineering and Applied Science

"Things fall apart; the center cannot hold," wrote William Butler Yeats. The poet's disturbing image could well describe the phenomena you have investigated as a scientist — why things fall apart and how to prevent structural failures. You have tackled the most difficult and important problems to create solutions that benefit people everywhere, often finding large answers by investigating small imperfections. Your seminal work in buckling theory resulted in the construction of safer undersea pipelines. Your examination of engineering fracture mechanics led to improvements in the structure of ships, aircraft, bridges, nuclear reactors, and ocean oil platforms. Your discoveries about the micromechanics of materials have advanced modern technology. We honor you for making the world a better and safer place.

RICHARD A. LERNER

Doctor of Science

An internationally renowned biomedical scientist, Lerner is president of the country's largest private nonprofit biomedical research organization, the Scripps Research Institute in La Jolla, California. He has pioneered research on the conversion of antibodies into enzymes, allowing scientists to tailor biological catalysts for specific chemical reactions, with important benefits for cancer chemotherapy. His work has also examined the biochemical foundations of sleep, the genetics of aging, and such diseases of aging as breast cancer, Alzheimer's disease, osteoporosis, and arthritis. Under his leadership Scripps has become one of the leading research institutes in the world, employing Lerner's vision of chemistry as the central science bridging drug discovery and drug development. Following his undergraduate work at Northwestern, Lerner earned his MD at Stanford University. He received the 1994 Wolf Prize in Chemistry and is a member of the National Academy of Sciences.

Presented by Richard B. Silverman, Charles Deering McCormick Professor of Teaching Excellence and professor of chemistry, Judd A. and Marjorie Weinberg College of Arts and Sciences

Like the antibodies you study, you are active on multiple fronts — directing the Scripps Research Institute with visionary leadership while you conduct groundbreaking biomedical research in an extraordinary range of areas. As a leader of scientists, you encourage multidisciplinary collaboration, procure cutting-edge technical resources, and, most important, grant the freedom to explore. In your own research you demonstrate a remarkable flexibility, working at once as a physician, immunologist, molecular biologist, and chemist to advance the treatment of cancer and diseases of aging. More than four decades ago you left Northwestern without a degree to pursue your medical education. Today you return as an internationally renowned life scientist. We are pleased at last to award you a Northwestern degree.

TONY RANDALL

Doctor of Fine Arts

Through his performances on stage and screen, Randall is widely recognized as an actor of exceptional versatility. He first explored drama at Northwestern before continuing his acting studies at New York City's Neighborhood Playhouse. After military service Randall worked on Broadway, in Hollywood, and on radio. Winner of an Emmy Award for his performance in the television comedy series *The Odd Couple*, he has also appeared in more than 30 films. But he has always returned to his original passion, the theater — performing in and directing both classic and contemporary plays. In 1991 he founded the National Actors Theatre, a nonprofit company dedicated to bringing new audiences to dramatic masterworks. Under Randall's artistic direction — combined with his service as director, actor, and tireless fundraiser — the theater has won broad acclaim for creating a living library of classic plays. He is a member of the Theater Hall of Fame.

Presented by Sherrill Milnes, John Evans Professor of Performance Studies, School of Music

As Felix Unger, you taught us to laugh at ourselves and our pretensions while gently reminding us of our vulnerability. An actor of apparently limitless range, you reveal the humanity at the core of all the characters

you portray. After mastering every dramatic medium — radio, television, film, and your first love, the stage — you have devoted yourself to introducing new audiences to the classics through your leadership of the National Actors Theatre. You bring passion and commitment not only to your acting and teaching but also to your active support of humanitarian causes. Your ardor for performing first took wing at Northwestern, where you recently returned to teach acting in opera, another of your passions. We are proud to count ourselves among your biggest fans.

GEORGE B. RATHMANN

Doctor of Science

A pioneer in the biotechnology industry, Rathmann has combined a shrewd business sense with a keen ability to recognize promising scientific advances. Following his graduation from Northwestern, he earned a PhD in chemistry from Princeton University and went on to work at the 3M Company, Litton Industries, and Abbott Laboratories. He then led Amgen from its 1980 inception until 1990. By the end of that decade it was the largest biotech company in the nation, responsible for the development of such drugs as Epogen, a red-blood-cell stimulant used by dialysis patients. In 1990 Rathmann founded ICOS Corporation, a biotechnology company devoted to developing commercial treatments for inflammation. He currently chairs Hyseq, which develops biopharmaceuticals to treat inflammatory and cardiovascular diseases. A member of the Board of Visitors of Northwestern's Weinberg College, Rathmann received the University's Alumni Merit Award in 1992.

Presented by Mark A. Ratner, Charles E. and Emma H. Morrison Professor of Chemistry, Judd A. and Marjorie Weinberg College of Arts and Sciences

By uniting pathbreaking science with visionary management, you have nurtured innovations that have improved the lives of people around the world. Completing your undergraduate education at Northwestern at the age most students begin, you pursued your passion for research in graduate study and then in industry, where you discovered the critical role that enterprise plays in translating invention into reality. At Amgen you engineered the development of a drug that has transformed the lives of dialysis patients, and at ICOS and Hyseq you have continued

to seek new ways for science to save lives. These remarkable achievements have earned you widespread recognition as a founder of the American biotechnology industry. For all this — and for remaining a loyal friend of Northwestern — we thank you.

THEDA SKOCPOL

Doctor of Laws

Victor S. Thomas Professor of Government and Sociology at Harvard University, Skocpol is recognized as a leader in the use of historical and comparative methods to address questions about states, societies, and public policies. She has written extensively about the causes and outcomes of social revolutions and about modern welfare states in Europe and North America. Her latest work focuses on current U.S. social policies and on civic engagement and voluntary associations in U.S. history. Skocpol's 1992 book *Protecting Soldiers and Mothers: The Political Origins of Social Policy in the United States* won five major scholarly awards. Her recent books include *Civic Engagement in American Democracy* and *The Missing Middle: Working Families and the Future of U.S. Social Policy*. Skocpol earned her PhD in sociology at Harvard, where she has spent most of her professional career. She directs Harvard's Center for American Political Studies and is president-elect of the American Political Science Association.

Presented by Kathy A. Thelen, Norman Dwight Harris Chairholder in International Relations and associate professor of political science, Judd A. and Marjorie Weinberg College of Arts and Sciences

Any citizen who hopes to make informed choices is obliged to make sense of debates over public policy. But while our obligation may be clear, public policy can be a murky subject. By shedding light on the complex workings of government and society, you help us all become better, more engaged citizens. Your insight illuminates critical issues of our time — social revolution, the modern welfare state, and civic engagement. By applying the multiple perspectives of history, sociology, and political science, you paint deep and nuanced portraits of your subjects. You are a model scholar, an eloquent writer, and a skilled educator who extends her knowledge beyond the classroom into the public arena to stimulate the highest level of social discourse. We are pleased to welcome you as a citizen of Northwestern.
